

ServiceJobs

## Field Service Management – The Business Benefits of Using The ServiceJobs App by ezManagement

**ServiceJobs App** is the Award-winning field service management App designed to help fieldworkers (engineers/technicians/tradesmen) manage their service jobs more effectively whilst on-site.

## Why is the **ServiceJobs App** considered one of the best field service management Apps for engineers & technicians?

The automatic relay of data (data-fetching which is seamless to the user) syncing in the background in Real-time back to the office, means that job pricing and invoicing can be completed & emailed to the customer in a click of a button, once the job is completed on the App.

This allows cash to flow back into your business faster than any other process.

The **ServiceJobs App** saves on average, an amazing **£5000 per year, per engineer!** If you would like to find out more - please contact us by scheduling a Demo below.
